

## Hurricane Disaster Research Tools

The table below highlights a collection of curated tools used in research responses to hurricanes and is intended for researchers looking to develop pre- and post-hurricane data collection instruments. Additional tools can be found by searching for various keywords of interest on the **NIH Disaster Research Response (DR2) Program's Disaster Research Response Data Collection Tools database** (<https://dr2.nlm.nih.gov/search>).

The **Database ID Number** links to full descriptive information about each tool on the web site. **Tool Name** links provide direct access to tools.
