Minority Health Resources

Trusted health information from the world’s largest medical library
www.nlm.nih.gov
Health disparities are preventable differences in the burden of disease, injury, violence, or opportunities to achieve optimal health that are experienced by socially disadvantaged populations. — Centers for Disease Control and Prevention

Health conditions that disproportionately affect minority communities include:
- Asthma
- Cancer
- Cardiovascular Disease
- Diabetes
- HIV/AIDS
- Infant Mortality

The National Library of Medicine (NLM) provides health information resources that address the concerns of diverse communities and populations.

Consumer Health
**MedlinePlus®**
Consumer health and drug information. Links to specialty pages on Health Disparities, Population Groups, and Multilingual Health Information
medlineplus.gov
medlineplus.gov/spanish

HIV/AIDS Information
**AIDSource**
Includes HIV information for consumers, physicians, scientists, researchers, educators, and students
